The CDC's National Healthcare Safety Network (NHSN) Antimicrobial Use and Resistance (AUR) Pharmacy Option to electronically collect data on antimicrobial use was re-launched in June 2011.

The following vendors are aware of this new reporting functionality and have expressed interest in providing services and software that will allow participation in the AUR pharmacy module through direct reporting. What follows is a list of vendors and appropriate vendor contacts for information regarding the AUR pharmacy module.

This information is provided as a service to SIDP members and registrants of the Antimicrobial Stewardship Certificate Program. This does not constitute an endorsement of these services and SIDP make no guarantees or warranties express or implied. Each facility must determine whether a vendor can meet their needs and which vendor, if any, will provide the services to best match their requirements.

Vendor Name	Vendor Contact	Contact e-mail	Actively Reporting Antimicrobial Use to NHSN*
Asolva, Inc	Chun Wong	cwong@asolva.com	Yes
