

# COVID-19 VACCINES ARE SAFE

Protect Yourself and Others  
by Getting a Vaccine

COVID-19 vaccines have  
been given safely to  
millions of people

The COVID-19 vaccine safety  
monitoring program is the  
strongest in U.S. history

You will be observed for 15-30  
minutes after your vaccine but  
severe reactions are rare

Pain, redness,  
and swelling may  
occur

Tiredness, headache,  
fever, and nausea are  
also normal

Expected post  
vaccine effects go  
away on their own
